

Gratnells

One educational tray system, worldwide.

A family business, with a global reputation.

When Neville Hudson and his father Leslie formed Gratnells in 1971, operating from a small London factory, it was a truly humble start.

Little did they know at that time just how successful the company would become.

Now, some forty years later, Gratnells is the world's leading manufacturer of educational tray storage systems.

Its products are shipped to more than 68 countries around the world.

And the Gratnells brand is the market leader in almost all of them.

Neville Hudson

Murray Hudson

What has made Gratnells the success it is today?

Is it the fact that four decades on, Neville is still in the business with his son, Murray, now meeting and greeting customers from Brazil to Bahrain?

Is it down to the 10,000m² state-of-the-art factory which rolls out millions of trays each year?

Perhaps it's due to the unique design of the Gratnells educational tray storage system (so far unrivalled)?

Well, this much is true.

Back in those start-up times, Neville determined that Gratnells would live or die on its principles of providing quality, innovation, service and value.

Today, those principles still remain the company's driving force.

So while the Gratnells of today has seen many changes during its growth, you can be reassured that some things will never be out of date.

The standard tray range

At the heart of the Grattells educational tray storage system is the standard F range of trays designed to fit 450mm deep furniture. With four different heights of tray, together with a range of inserts and a clip-on safety lid, the standard F range can accommodate most storage needs. The excellence of the tray design specifically for education has been recognised by Worlddidac, the international organisation that represents education suppliers worldwide.

Wooden furniture wouldn't be complete without Gratnells trays.

Standard trays don't just go into Gratnells frames and trolleys. Many of the world's leading furniture manufacturers use the Gratnells standard range of trays in their wooden storage cabinets and units too.

Some furniture accommodates Gratnells trays on shelves, while other storage units are fitted with Gratnells tray runners (available in standard versions or the popular Stop'n'Tilt alternative).

And for classroom desks and tables, Gratnells supplies both trays and runners as under-desk additions.

Standard runner

STOP'N' TILT

High strength adjustable frames and trolleys.

To make the most of our standard trays we have a complementary frame and trolley range. Using a removable runner, all four heights of tray, along with lids and inserts, come together to create a fully flexible tray storage solution. With the addition of shelves all the equipment a school needs to store can easily be accommodated.

Frames and trolleys are available in a number of popular colours and the treated metalwork can be used in schools where heat, humidity and chemical resistance is required.

Adjustable runner

Using Gratrnell's adjustable runners any combination of tray sizes can be created. The clever design means that the storage configuration can be easily altered in the future without compromising product stability.

GratStack®. Super safe, super tough.

The final part of Grathnells educational tray storage system is the GratStack®. Units can be configured as a trolley, table-top unit or used as an expanding storage facility. Using its unique linking method, each GratStack® unit can be joined vertically or horizontally, forming almost limitless storage.

Click-together modular tray storage.

**Build up,
build across.**

Available in six different frame colours GratStack® is at home in any classroom, resource room or laboratory.

And with a Worlddidac Certificate of Quality awarded for its educational value, innovative design and sturdy construction, it doesn't get better than GratStack®.

The Gratnells Educational Tray Storage System

Classroom stationery

We have over 20 designs of plastic insert and can offer custom designs.

Gratnells

Pre-school

Safe • Colourful • Creative

Standard tray range

Four standard trays offer many options for the storage of smaller items along with larger soft toys.

F1

F2

F25

F3

HappyStack®

HappyStack® is a great way to have visible storage combined with stimulating colours. The clever design allows several large trays to be shown at a angle or level, with easy access and space efficient-storage.

HS10444

Quadrant tray

The Quadrant tray maximises corner storage and offers many creative options for wood furniture makers. Fewer sharp corners improves room safety.

Q2

Sit'n'Store

Sit'n'Store makes story time fun, by keeping books and other larger materials directly under a seat. Fits directly into furniture.

SEA1

F3

Need corner storage?

The Quadrant tray can also be used with a wall bracket to offer additional visible storage.

Q2

GratStack® in wooden furniture

The delivery of assembled furniture is expensive and easy to damage. By combining a simple flat pack wood frame structure with a matching beech coloured Gratstack® it is possible to ship the furniture flat without sacrificing appearance.

GratStack®

Built-in units and shelving are not always suitable for classroom storage needs.

That's why GratStack® is ideal for classroom storage and is shown here with multiple stacks linked together.

GratStack® is a very safe way to store materials, and with no sharp edges, it reduces the risk of accidents.

ToyTidy®

The ToyTidy® adds a fun theme to mobile storage. Choose bear or plain castors.

ToyTidy®

Standard tray range

Gratnells standard trays can be used to great effect in baby changing units. In particular, translucent trays offer an effective way to see contents.

F1

P5

“ Gratnells trays are stackable, useful, and beautiful. Since we started packing science kits in Gratnells trays we have received appreciation from teachers who find them perfect for their storage. The trays are ever more popular in Japan and here at Narika we will be developing more kits in the future. ”

Ms.Yuka Nakamura

President, Narika Corporation,
Tokyo, Japan

4 - 12 Years

Practical • Expandable • Flexible

Cubby tray

The Cubby tray is a compact version of our standard deep tray, used here in a cloakroom area. Children can have their own personal storage tray for wet shoes or personal effects. And the Cubby tray can be easily cleaned and moved around, even by younger children.

HappyStack® Eco

There are four different HappyStack® units in the Gratnells range, from six tray, three-level storage to a single low unit when space is tight. And when it comes to promoting 'green' issues, what could be better than the HappyStack® Eco shown here.

Standard tray range

Mix and match our four heights of tray and add runners to create a highly flexible storage solution within a single piece of furniture.

GratStack®

When storage space needs expanding, GratStack® is the ideal solution. The special design enables each GratStack® unit to be linked vertically or horizontally via a unique click-together system. As the storage needs grow, so can GratStack®.

Super safe, and super tough, GratStack® boasts an International Certificate of Quality for its educational value, innovative design and sturdy construction.

Class sets

We offer a range of inserts that allow efficient partition of teaching materials. We are also able to make custom designs in both plastic and foam.

ToyTidy®

The ToyTidy® is a jumbo tray complete with castors. It means that children can simply pull it to their learning area and when it's time to tidy up, the unit can easily be pushed back to the storage area.

Each ToyTidy® comes with bear decals and matching bear castors or plain castors.

“ High quality equipment for education is one of the pillars of Eurofysica. Thanks to the Gratnells products we sell more of our high quality equipment. An ideal storage system for physics, chemistry and biology. ”

Louis Smits

Managing Director, Eurofysica.
The Netherlands.

4 - 12 Years *Creative*

Stimulating • Hygienic • Moveable

Cupboard with flexible tray storage options.

Why limit a cupboard to using only shelves? With creative use of trays and Gratstack® a much larger amount of storage options can be explored. Unlike a shelf, trays can be taken into the classroom and returned. Also Gratstack® on castors can be moved around the room, yet be quickly stored back in the cupboard base.

F1

F2

F25

A3 paper trolley

The trolley for A3 paper allows larger paper sizes to be correctly stored and easily moved into the correct working position. Wooden furniture makers also make their own version of this trolley.

D3

801

ArtStack

ArtStack is a special adaption of the GratStack®, but with extra height above each tray. This means art materials and equipment that require more vertical storage capacity in a small footprint can easily be accommodated.

ArtStack units can be linked together just like GratStack®, creating the storage that's exactly right for every classroom need.

GS1673

GS1653

Art trolley

Our art trolley featuring our widest tray allows large and odd shaped classroom articles to be easily stored.

The trays provide excellent table-top working areas for painting, sculpting and puzzles. The tray can be easily cleaned and returned to the trolley after use. Wooden furniture makers also offer a trolley for this purpose.

A1

901

Classpacks

Many leading stationery manufacturers pre-pack their products in Grathells trays. Inserts are available to take 144 standard pencils along with other inserts for a range of markers and crayons. This drastically reduces waste as the transit packaging and the storage method are combined.

Complementary trays

Space is often at a premium in a multi-use room. But a combination of wooden hinged furniture and the Grathells N range of trays provides the complete solution.

Trays always outperform shelving, and with the smaller footprint of the N trays, a hinged furniture unit can store materials in less space. In addition, the unit can be locked and put away when not in use.

And with the special handle cut-out on the sides of the trays (NS1 and NS2) removing and replacing each tray is a simple, fast and safe task.

J2

NS2

“ Maths and Science Kits packed in Gratnells trays always appeal to schools. But marketing these kits as a package already organised in frames and trolleys has been a real winner for Abacus Educational Suppliers.”

Trevor Sampford

Owner, Abacus Educational
Suppliers Pty Ltd
Perth, Australia

“ Working with the folks at Gratnells over these past 11 years has proven to be both a pleasure and a profitable business experience. The quality and value of their products is outdone only by their commitment to customers and their willingness to participate in the marketing process. ”

Mark Wendler

President,
Child's Play, California, USA

12+ Years

Efficient • Organised • Space-saving

Under desk tray and brackets

For more formal desk arrangements, Grattells offer a single and double under desk runner bracket for use with either our standard or complementary N range of trays.

TFP5

F1

GratStack®

GratStack® with castors allows easy moving of teaching materials to area of use. A small Gratstack unit is also shown here on a shelf enhancing the storage possibilities.

F1

F2

Adjustable trolley

Our high strength adjustable trolleys teamed with a wooden top offer attractive flexible and mobile storage for the classroom.

Adjustable frames

Frames bring adjustable and highly practical storage direct to the classroom. Tray combinations and configurations can be altered at any time, so the frame adapts to future needs.

Science, Design & Technology

Robust • Adjustable • Interchangeable

Science class sets

Our standard trays in conjunction with lids and inserts can be used to store class sets of glassware and equipment. With a dedicated space for each item, it is clear when something is missing.

Gratstack®

Gratstack® offers chemical resistant additional storage that can be placed directly onto the workbench or shelf.

Adjustable trolley

Our high strength trolley offers safe transit from a resource area direct to the location of use. The result: fewer accidents.

3025

G3

F1

F2

F25

Chemical spill tray

Our A1 tray made of chemical resistant polypropylene makes an ideal spill tray for chemicals and reagents.

A1

High strength frames and trolleys

Gratnells storage frames and trolleys are available in many heights and widths. They offer much more efficient use of space than just shelves.

Accessories such as extra width trays add further flexibility. With no doors needed, storage frames can be arranged closer together, and provide quicker access to equipment.

As classroom materials evolve our storage adapts too. The runners can be simply adjusted and securely refastened meaning that this storage solution will never become out of date.

Kits in Gratnells trays

Gratnells supplies many of the world's leading science experiment kit makers with the perfect packaging solution. Using our standard range of trays, inserts and clip-on lids, educational kits are fully protected from frequent handling.

F1

F2

LF1

Standard trays used for design and technology

This tool cupboard makes the most of the standard tray range for the storage of tools and materials.

Lockable cabinets

Classic storage cabinets can be supplied complete with Gratnells trays. This provides a much more space efficient storage system than shelves and offers a handy way to store kits and class-sets.
