On The Connections With Maria Montessori And AMI

Nienhuis – Now And Then

After the establishment of the first Casa dei Bambini in Rome, 1907, the news of the miracle children was quick to spread to Italy's neighboring countries and the rest of world. Interest in this new form of education spread to The Netherlands, and a few Dutch early childhood educators set off for Rome to study at the international teacher training courses that Maria Montessori started in 1913.

In 1914, the first group of Dutch children gathered in the home of Mrs. J.J. Werker in The Hague, who had set up a small Montessori 'Casa dei Bambini'. Soon afterwards, few other schools opened their doors in other parts of the country. With Montessori education increasingly finding groups of parents interested to have their children enjoy this new type of education, it was desirable to pool resources and knowledge, and coordinate the necessary lobbying with educational authorities. These considerations led, in 1917, to the foundation of an official Dutch Montessori Society, to become a resource for Dutch Montessorians and to liaise with Maria Montessori.

As ever, the demand for and availability of good quality materials made in accordance with the scientific specifications required by Maria Montessori was a prime concern; a special materials committee took it upon itself to have the Montessori materials made in country, as it was not always easy to import the materials from England or Italy. The Dutch Society established a Leermiddelenhuis (didactic apparatus center), which by 1922 was fully operational. In 1923, when Maria Montessori gave a teacher training course in Amsterdam she gave extensive feedback on how the materials had been produced, and she discussed alternative colors for certain materials. In 1922, the Leermiddelenhuis was granted a special contract by Maria Montessori allowing them to produce materials 'with a blessing' - a contract which was renewed ten years later.

Around 1926 a carpenter named Albert Nienhuis joined the Leermiddelen company. He was experienced in making small wooden objects, and was asked to assist with the Montessori materials. He first created the abacus, then The Geometric Cabinet and progressed on to more intricate materials such as the 1000 cube. As business grew, Mr Nienhuis' two sons also joined the company.

In 1929, Maria Montessori herself took the initiative to create the Association Montessori Internationale (AMI). She wished to have the full support of a strong and dynamic organization that could respond to the growing interest in Montessori education worldwide; an organization that was excellently positioned to further a full understanding of her ideas, to coordinate the publication of her writings, and license the manufacture of the carefully crafted developmental materials.

During the Second World War, when most goods were in short supply, Albert Nienhuis proved to be exceedingly resourceful in finding the necessary 'raw materials' that allowed him to continue production of the Montessori 'apparatus'. In 1945, after the war, the showroom of materials was moved to the Nienhuis family home in The Hague — and from that time the manufacture and sales were managed by the same company. As the demand for materials grew, the company found itself short of the necessary space and eventually, it was decided to relocate to the small town of Zelhem, in the East of The Netherlands. There it evolved into a truly international manufacturer of Montessori materials, making the materials according to the blueprints as specified, first by Maria Montessori and Mario Montessori, and later by the AMI Materials Committee to which the Montessoris' had delegated the responsibility of liaising with Nienhuis.

Over the years, AMI and Nienhuis, which almost share their 'date of birth', have grown together and both have become household names in the Montessori world.

Montessori education has a firm foundation in many countries in the world, with new countries and communities expressing interest and finding their way to AMI and Nienhuis. This global appeal means that Montessori schools, educators and manufacturers have evolved into a large worldwide network.

Today, Nienhuis and AMI are working closely together to forge an innovative strategic partnership in order to create new opportunities for children from all cultures and socio-economic backgrounds to experience the Montessori educational approach.

They are doing this following AMI's three strategic pillars, which are:

LEGACY – The Study of Childhood – articulating Montessori philosophy and practice clearly in order to meet the needs of children and influence educational paradigms in a rapidly changing world through the support and dissemination of research on the development of children and young people.

CAPACITY – Montessori Education for All Children – serving more children around the world by increasing access to AMI training, supporting professional development of Montessori teachers and providing comprehensive support systems for Montessori schools across all sectors.

OUTREACH – Montessori Education for Social Change - promoting 'out of the box' sustainable initiatives to reach communities in vulnerable and at-risk situations, and additionally to promote the rights of children and young people throughout the world.

In this context, AMI and Nienhuis hope that by creating a dynamic relationship more resources will be mobilized in support of children who are, in the words of AMI's mission statement, "the transforming elements of society leading to a harmonious and peaceful world".

Lynne Lawrence | AMI Executive Director

Infant / Toddler 0 – 3

Each new human being, from conception to maturity, forms himself or herself, taking from the environment (the womb, the home, the community) the materials for self-construction. In the first two months of life, the infant, having moved from the comfort of the womb, learns to trust the new outside world. During the rest of the first year of life, infants learn to trust in themselves: “I can do; I am able.” In the next two years, they confirm that they are able to act in the world: “I am worthwhile; I can contribute.” The overall goal, one that overshadows the particular goals of ‘curriculum areas’, is a profound self-esteem and a healthy, happy, strong self-image.

Practical Life

Infant / Toddler 0 – 3

Practical life activities help your child develop order, concentration, coordination, and independence. By developing those qualities, both the child and the learning environment are calmer and learning is easier.

Infant / Toddler Furniture

One of the key concepts in this environment is learning to be independent. Rather than using the traditional 'high' chairs, which rely on adult intervention, the furniture is lower in height and smaller in size. Take for example the Weaning Table and Chair, these pieces are specifically designed for an infant as young as 6 months. They are low to the ground and the seat of the chair is deeper to allow the infant to sit with crossed legs further enhancing their stability. The Infant / Toddler Shelves are open, and low to the ground with only a top and bottom shelf. This allows both the infant and the teacher to see through the shelves while maintaining a safe barrier. The Toddler Tables and Chairs stand a bit higher, and the Toddler shelving has a center shelf for additional material storage. Our Infant / Toddler line of furniture is made from birch wood and the finishes are double-coated lacquer to facilitate cleaning and for long-term durability.

“In the first three years of life, the foundations of physical and also of psychic health are laid. In these years, the child not only increases in size but passes through great transformations. This is the age in which language and movement develop. The child must be safeguarded in order that these activities may develop freely.”

Early Childhood 3 – 6

Between the ages of 3 and 6, Maria Montessori called this environment Casa dei Bambini (Children's House). Having created the foundations of their personality, three-year-old children arrive in the prepared environment ready to develop and perfect their abilities. They learn best through real-life activities that support independence and self-efficacy; manipulation of objects to provide concrete sensorial experience; and open-ended exploration leading to the refinement of their movements, sensory perceptions, language and the development of their intellect. All members of this expanded community of 3 to 6-year-olds thrive through opportunities to follow their own interest, freely choose their own activities, develop their capacity for concentration, and engage at their own pace their emerging powers of reason, imagination, and sociability.

Materials and activities are designed to support self-directed discovery and learning, and so are a perfect match for this developmental stage. They are organized around Practical Life activities that develop both independence and social skills; Sensorial activities that refine sensory perception; the development of Spoken Language, Writing and Reading skills; and Mathematical activities that develop fundamental mathematical concepts; as well as activities that reflect upon our human understanding of geography, history, biology, science, music, and the arts. The trained adult guides the children along this journey, helping them become well-adapted individuals, ready to take a positive, pro-social place in their world.

Practical Life

Early Childhood 3 – 6

Practical life activities help your child develop order, concentration, coordination, and independence. By developing those qualities, both the child and the learning environment are calmer and learning is easier.

Sensorial

Early Childhood 3 – 6

From an early age children are developing a sense of order and they actively seek to sort, arrange and classify their many experiences. The sensorial materials provide a key to the world, they are a means for a growth in perception, and understanding that form the basis for abstraction in thought.

Language

Early Childhood 3 – 6

According to the Montessori philosophy reading, writing, spelling and language should be not taught as separate entities. Children are immersed in the dynamics of their own language development and the Montessori approach provides a carefully thought-out program with activities to facilitate this process.

ENGLISH AS A FOREIGN LANGUAGE

Exploring English: Kindergarten 3 – 6

Exploring English is a complete curriculum meant to learn English as a foreign language for kindergarten and elementary. It is a material to learn English, to do English and to experience English. This curriculum has been developed from the 'learning by doing' perspective and contains a lot of Montessori elements. Exploring English is developed fully in line with the Common European Framework of Reference for Languages and is integrated with all other educational subjects like math, geography, biology, history, science etc. Phenomenon based learning at its best.

Mathematics

Early Childhood 3 – 6

Mathematics is a way of looking at the world, a language for understanding and expressing measurable relationships inherent in our experience. A child is led to abstract ideas and relationships by dealing with the concrete.

Tellurium

Tellurium is a model used to demonstrate the movement of the earth and the moon around the sun. This attractive and captivating material is a simplified reproduction of the solar system. Tellurium is not a replica of the reality, but a model to explain the different principles of day and night, summer and winter and the positions of the moon. Tellurium visualizes to the children, the fascinating effects created by the rotational movements in our sun-earth-moon system. There are 3 major rotations:

- The earth rotates on its axis every day. The result is day and night, enabling us to see the sun, moon and stars moving across the sky.
- The moon revolves around the earth approximately every four weeks. The result is the different phases of the moon.
- The earth (with the moon) revolves around the sun in one year. This is where we get our seasons and the fact that we can see other constellations. Using the flashlight, 'sunlight' can be projected on the earth and the moon to show the children the different effects as the earth and the moon revolve. Included is a figure that can be affixed on the globe to make it easier for the children to place themselves in the situation. An instruction manual that gives further information on the use of the Tellurium is included.

Elementary 6 – 12

Elementary children are driven to understand the universe and their place in it and their capacity to assimilate all aspects of culture is boundless. Elementary studies include amongst others geography, biology, history, language, mathematics in all its branches, science, music and art. Exploration of each area is encouraged through trips outside the classroom to community resources, such as library, planetarium, botanical garden, science center, factory, hospital, etc. This inclusive approach to education fosters a feeling of connectedness to all humanity, and encourages their natural desire to make contributions to the world.

Language

Elementary 6 – 12

The Montessori elementary language curriculum builds upon what the child previously learned in the Montessori preschool years. Elementary children's imaginations are ready for origins of words, fictional characters and studies of the history of the written language, but they still need physical movement and opportunities to work with didactic material.

Grammar Sense Game

The Grammar Sense Game helps the child internalize a sense of the functions of the parts of speech. Children choose words randomly and place them into a sentence structure template based on their function. The sentences created are grammatically correct, but semantically nonsensical. It is great fun for the children. Includes: 1 base block, 4 paddle cards, 2 control charts, 1 flow chart, 84 word cards, instructions and a wooden box with lid. Designed by Mark Powell.

Grammar Symbol Tiles

The Grammar Symbol Tiles enable a child to learn the grammar symbols in a very dynamic and physical way. Just like in a written sentence, the verb has a central role and all the other symbols are laid in a circle around it. As one child reads a sentence, another child leaps from symbol to symbol indicating the various parts of speech of the sentence. The diameter of the verb is 50 cm.

Item Number: 010750

The Land Of The Parts Of Speech

Mathematics

Elementary 6 – 12

At the elementary level, the child will continue to use manipulative materials to gain an understanding of mathematical concepts. Once the child realizes that the mental process is faster than manipulating the materials it will slowly move away from the materialized abstraction.

Geometry

Elementary 6 – 12

Since elementary children take great joy in intellectual activity, the study of geometry is perfectly suited for them. The geometry materials give ample opportunity for the children to explore the laws of geometry. Instead of memorizing theorems, the children experience the sensorial representations of theorems so that if they return to a study of geometry, they will have built a foundation for understanding.

GENERAL

Essentials

Elementary 6 – 12

“Education between the ages of six to twelve is not a direct continuation of that which has gone before, though it is built upon that basis. Psychologically there is a decided change in personality, and we recognize that nature has made this a period for the acquisition of culture, just as the former was for the absorption of the environment.”

Maria Montessori

On the following pages you will find a clear overview of all 6 – 12 essential materials that has been agreed by the Scientific Pedagogy Group of the AMI.

The Secret Of Childhood

The book *The Secret of Childhood* is divided in three sections, dealing in turn with early childhood development, the author's educational method, and the relation of the child to society. First, Montessori talks about the new-born child who is not only a body ready to function as a body, but also has a spiritual embryo with latent psychic capacities. The second part of the book gives an account of the first Casa dei Bambini about the essence of the Montessori Method. The adult should be determined to learn from the children rather than to force their own ideas on them. The essence of the Montessori Method lies in: observing, helping, presenting, rather than teaching or forcing. The adult, Montessori claims, must play a low-key role; all is free and open for the child, who chooses his own materials to work with, and learns from them because they interest him. Given the method of free choice of work and materials, the concentration is high and the need for punishment and reward is not necessary. Relieved from the emotional strain of competition and fear, the child becomes stable, confident and happy.

Maria Montessori Sails To America

During her first voyage to America at the end of 1913, Montessori kept a diary in which she dwelled on the major changes that had taken place in her life in that year and looked forward to what her visit to America might have in store for her and her work. Maria Montessori demonstrates her powers of observation and describes life on board with relish and wit. The diary also gives a rare insight into her budding relationship with her adolescent son Mario, who had come to live with her earlier that year. Translated and introduced by Carolina Montessori, her great-granddaughter, this small book is an absolute must-have for anyone interested in Montessori's life and career. This is the first time that Maria Montessori's thoughts, feelings and impressions, written down by herself, are being published.

Maria Montessori Writes To Her Father

Maria Montessori traveled to America for the first time in 1913, a hugely successful visit leading to an even greater interest in her educational ideas. In the following year, her American supporters urged her to return to conduct training courses, which were in great demand. To celebrate the formidable technical achievement of constructing the Panama Canal, two simultaneous expositions had been organized: The Panama Pacific International Exposition in San Francisco and the Panama-California Exposition in San Diego. Montessori was invited to give training courses and direct demonstration classes at both fairs. In August 1915, the famous Glass Class was opened at the San Francisco Expo. She had hesitated to accept these invitations, as it meant leaving behind in Rome her 82-year old father, Alessandro Montessori, who was in a frail condition. The letters in this volume, written to her father during the eight months spent in California in 1915, are testimony to Montessori's great quality as an observer. Her keen eye to detail combined with her colorful descriptions reveal a spontaneous personality, delighted by what she saw and experienced; they equally show how loving and concerned a daughter Montessori was.

The 1913 Rome Lectures

Maria Montessori organized the 1913 training course in Rome in response to many requests, from all over the world, but particularly the United States. It is the first course that was especially devised to provide international students to benefit from a bilingual curriculum. Whilst Montessori obviously delivered her lectures in Italian, simultaneous English translation was offered by two students: Zoe Bateman, who went on to become secretary of the Montessori Educational Association (USA) founded by parents impressed by Montessori's work Miss George had started, and Emily Greenman, who was one of the first to express interest in taking a course with Dr Montessori, if she were to offer that in the English language. The lectures on this 1913 course testify to Maria Montessori's passion as a thinker on human development. They show the depth of her background as a doctor of medicine, anthropologist, philosopher and pedagogue giving an enthralling insight into how she was influenced by her time, where she adopted new and traditional ideas as an inspiration and how she explored new directions.

BY MARIA MONTESSORI

Psychoarithmetic

Psychoarithmetic by Maria Montessori provides a view of the working of the human mind through the lens of exercises and study of mathematics (arithmetic, geometry, and algebra and their relationships), as well as applied mathematics in the form of measurement. The intention of the book, to forge a link between psychology and mathematics, is obvious from the title. The book demands that the reader attend to each and every detail while at the same time keeping in mind that all the details form part of the whole one is trying to understand. The book also pays homage to the people throughout the ages who have thought and found ways to solve their daily problems of living through mathematics. Yet without developing the mind through exploring mathematics, one cannot utilize these ideas. So the book is intended to be a handbook, for both children and adults, of how to help the mind develop in order to fulfill its potential.

El Niño En Familia

Spanish

Spanish version of 'The Child In The Family'.

El Niño en familia reúne una serie de conferencias dictadas en Bruselas en 1923, en donde María Montessori esboza la creación de una escuela para padres. Este texto es entonces una lectura ineludible, no solo para los científicos y los educadores, sino también para los padres y el público en general, ya que habla de uno de los problemas sociales más urgentes. La humanidad no podrá avanzar únicamente con los adelantos de la ciencia y la tecnología, tendrá que mirar la parte más vulnerable y sensible de la sociedad: El niño. Los problemas de la educación se derivan de una causa central que yace en el subconsciente social de toda la humanidad. Los problemas de la educación que se relacionan con la individualidad, el carácter, el desarrollo de la inteligencia y la libertad tienen origen en el conflicto permanente entre el adulto y el niño. La ciencia de la educación enfrenta enormes obstáculos para poder resolver los problemas que la aquejan. Montessori nos habla de la necesidad de revisar estos conceptos medulares. Es necesario una reforma real, capa de trazar nuevas rutas a la educación, que hasta ahora ha seguido por un camino sin salida. Sean las palabras de la Dra. Montessori una luz que ilumine dicho camino, ya que nos ofrece una propuesta tan interesante como efectiva.

Educación Y Paz

Spanish

Spanish version of 'Education And Peace'.

María Montessori nos invita a construir una ciencia de la paz que nos ayude a educar a los hombres en armonía. Ella propone que el trabajo preliminar para lograr dicha organización debe centrarse en la infancia, etapa adecuada para sembrar la semilla de la paz. Dentro de las organizaciones sociales, la paz se basa en la naturaleza misma del hombre. La educación es la mejor arma para la paz, dice Montessori, la educación como piedra angular. Esta recopilación de discursos pronunciados por María Montessori en congresos internacionales y distintos organismos que abogan por la paz ponen de relieve los motivos por los cuales fue propuesta como candidata al Premio Nobel de la Paz. Sin embargo el tema de la paz explícita o implícitamente corre a lo largo de toda la obra de Montessori. Nos muestra claramente que la paz duradera solamente puede alcanzarse a través de la educación.

Educar Para Un Nuevo Mundo

Spanish

Spanish version of 'Education For A New World'.

Esta pequeña joya que tienes en tus manos es un compendio del pensamiento de la Dra. Montessori. Nos lleva de la mano por los orígenes del sistema, dándonos una clara visión de los sorprendentes hallazgos que iba encontrando, según se adentró en los secretos del desarrollo infantil; mismos que sentaron las bases de lo que hoy conocemos como principios Montessori. Con una narrativa fluida y apasionada se nos invita a colaborar con la naturaleza, como padres y maestros y ayudar a que las capacidades individuales de cada pequeño ser salgan y brillen con luz propia, removiendo los obstáculos que se interpongan en su camino hacia la realización.

Formación Del Hombre

Spanish

Spanish version of 'Formation Of Man'.

El niño tiene el impulso natural de crecer y perfeccionarse por sí mismo. Por lo tanto, educar es guiar el desarrollo de la vida del hombre y del medio ambiente que lo rodea. La propuesta pedagógica de María Montessori sostiene que el proceso de crecimiento, maduración-individualización y el resultado del desarrollo de las potencialidades humanas, deben adaptarse al desarrollo del patrón específico de la especie humana. El hombre se hace un ser humano viviendo entre seres humanos. Esto no puede adquirirse sin la ayuda de los adultos, la cual sólo puede obtenerse si el adulto ve con más respeto el esfuerzo del niño por construirse a sí mismo y asimila el amor como la fuerza que une su relación con él. Sin embargo, no es el adulto quien debe fijar el camino que ha de seguir el esfuerzo del niño, sólo la naturaleza, que ha establecido unas leyes determinadas y que ha fijado algunas necesidades del hombre en vías de desarrollo, puede dictar el método educativo preciso, que consiste en satisfacer las necesidades y las leyes de la vida. Estas páginas aportan a los educadores, a los padres y a todas las personas de buena voluntad, tesoros de una experiencia reveladora que se puede calificar de dramática por la fuerza con que en ellas se ha volcado la labor de María Montessori y por el anuncio que hace de una reforma social de incalculable valor.

La Educación De Las Potencialidades Humanas Spanish

Spanish version of 'To Educate The Human Potential'.

En La Educación de las Potencialidades Humanas Maria Montessori expone su programa denominado La Educación Cósmica. En la primera parte, este volumen nos revela el gran secreto del éxito de su método educativo: la capacidad de estimular de una manera inteligente la imaginación creadora del niño para despertar el interés, y así plantar las semillas de la ciencia en el niño, siempre relacionándolas a una idea central e inspiradora del Plan Cósmico. En este Plan Cósmico, todo y todos se encuentran y reconocen, obedeciendo al gran objetivo de la vida: trabajar juntos para el beneficio de todos. En los capítulos sucesivos, la autora sugiere como revelar al niño este Plan Cósmico, mediante la emocionante narración de la historia de la Tierra en la cual vivimos, tomando en cuenta su transformación, la aparición de los primeros hombres y el desarrollo de las civilizaciones mas antiguas. Los tres capítulos que concluyen insisten a su vez en otro aspecto fundamental: la preparación del educador.

El Niño – El Secreto De La Infancia Spanish

Spanish version of 'The Secret Of Childhood'.

Educar al niño no es transmitirle cultura sino facilitarle el hallazgo de su propio yo, con todas las riquezas de esa maravilla que es su mundo interior. La etapa más propicia para realizar esta tarea son los primeros años de la vida del pequeño. Este fue el descubrimiento de la gran educadora Maria Montessori, que introdujo la revolución pedagógica más importante del siglo XX. El objetivo de esta forma de enseñanza es sin duda lograr el desarrollo armónico de un ser humano más completo y dinámico, pero a partir del principio mismo de su existencia: los primeros años de la infancia. El método Montessori tiene como factores centrales de su pedagogía la importancia decisiva del ambiente en que el niño crece y se descubre a si mismo en medio de su mundo, y el respeto absoluto a la personalidad del educando. Los Milagros logrados por la autora del método han impresionado a todos los que de alguna manera intervienen en la educación de los infantes y los niños, y su influencia se ha extendido ya a todos los países del mundo. Por esta razón El Niño, el secreto de la infancia, es un libro para el profesionista de la educación, así como para los padres de familia.

La Santa Misa – Vivida Por Los Niños Spanish

Spanish version of 'The Mass Explained To Children'.

No es necesario que el niño sea un sabio para seguir la Misa; pero lo es que sea espiritualmente libre. Es decir, la instrucción no debe confundirse con la práctica del culto. El misal debe ser para el niño, como para nosotros, una pura y simple reproducción del texto litúrgico: y la parte de enseñanza instructiva se debe reservar para el atrio o para un momento distinto del de la asistencia al rito. Ya es cosa convenida entre la mayor parte de los que hoy buscan el medio de elevar la preparación religiosa de los niños, que el misal de los niños debe ser una reproducción del texto litúrgico. Pero la disposición del texto litúrgico se ha de hacer de forma accesible al niño.

Lo Que Deberías Saber Acerca De Tu Hijo Spanish

Spanish version of 'What You Should Know About Your Child'.

El método Montessori es una educación científica basada en un firme conocimiento de la infancia y la niñez. En este volumen, la Dra. Montessori examina el desarrollo mental y físico del niño en sus primeros años y discute lo que para ella son las verdades básicas de la naturaleza del niño, de su crecimiento y desarrollo. Ella nos dice que la educación es una ayuda a la vida, de acuerdo a las leyes que gobiernan el desarrollo humano. El éxito en la educación depende claramente en la comprensión del secreto de la vida, con una visión de servicio en pos de desarrollar las grandes energías del hombre dentro de una estricta normalidad, tanto en el campo físico como en el psíquico. El cúmulo de preguntas que ella se hace y contesta forman lo que conocemos como la Psicología infantil o la Ciencia de la Niñez, en la cual se basa el Método Montessori. El libro incluye una breve biografía de María Montessori.

María Montessori Le Habla A Los Padres Spanish

Spanish version of 'Maria Montessori Speaks To Parents'.

María Montessori estaba muy consciente del papel tan importante de los padres y de su necesidad de un claro entendimiento de sus ideas. Ella, por lo tanto, dio conferencias a los padres de vez en cuando durante sus cursos de entrenamiento y congresos. Desafortunadamente nunca encontró el tiempo para escribir un libro especialmente para ellos. La Editorial Montessori-Pierson ha elegido 11 conferencias en las que María Montessori habla a los padres de familia, explicando como podrían entender mejor su propio papel en el desarrollo de su hijo. Paula Polk Lillard, una autora Montessori internacionalmente reconocida escribió el prólogo en el cual ella explica su transición de ser una maestra tradicional en el sector público a ser una mamá y maestra Montessori. El libro incluye una breve biografía de María Montessori.

De La Infancia A La Adolescencia Spanish

Spanish version of 'From Childhood To Adolescence'.

Montessori ve a la adolescencia como el "período sensitivo" para las relaciones sociales, la época en la que el niño debe hacerse un lugar para sí con sus contemporáneos y en la que comienza a considerar las realidades sociales de una comunidad más extensa. La escuela experimental de Montessori para la vida social estaría en un medio rural, en donde los niños y sus maestros, predominantemente jóvenes, vivirían en una comunidad independiente, autogobernada y autosuficiente a un nivel considerable. Cultivando sus propios alimentos y tal vez administrando una casa de huéspedes o tienda, aprenderían de primera mano sobre el trabajo del mundo.

L'Esprit Absorbant De L'Enfant

French

French version of 'The Absorbent Mind'.

Le monde de l'éducation est une espèce d'île où les individus, déracinés du monde, se préparent à la vie en y restant étrangers. Cette critique, radicale, que Maria Montessori adressait à l'école, l'a conduite à penser et à expérimenter une autre pédagogie. L'esprit absorbant de l'enfant est le dernier ouvrage écrit par Montessori. Elle le présente comme un chaînon dans le développement de notre pensée et de notre œuvre pour la défense des forces de l'enfance...

L'Enfant Dans La Famille

French

French version of 'The Child In The Family'.

Connue surtout pour sa méthode pédagogique touchant aux premières années de la scolarisation – à travers les Maisons des enfants dont la première a été créée en 1907 à Rome –, Maria Montessori (1870–1952) s'est également intéressée aux premières relations de l'enfant dans sa famille. Une réalité très sensible aujourd'hui où bon nombre de parents ne savent plus se situer dans une juste relation avec leurs enfants, qui puisse concilier respect et autorité. Ce livre rassemble les textes inédits d'une série de conférences données en 1923 à Bruxelles sur ce thème. Maria Montessori propose à sa manière un guide à l'intention des parents et éducateurs, pour éviter toute incompréhension ou tentation d'autoritarisme.

L'Éducation Et La Paix

French

French version of 'Education And Peace'.

Plus que jamais la paix reste à faire. Plus que jamais, peut-être, elle sera dans les prochaines décennies un enjeu de survie de l'humanité. Plus que jamais elle se fera dans la tête des hommes. Car la paix, comme l'avait bien compris Maria Montessori, n'est pas la non-guerre. Ce n'est pas seulement affaire de diplomatie, d'armée et de cessez-le-feu. Trop souvent les peuples qui gagnent la guerre perdent la paix qui suit, car les valeurs nécessaires pour gagner la guerre – simplification, obéissance aux ordres, clarté de la distinction entre amis et ennemis, etc. – n'ont rien à voir avec les valeurs nécessaires pour construire une paix durable – la capacité à admettre et comprendre la complexité, la capacité à coopérer avec l'autre, l'esprit critique, le sens du compromis, la perception aiguë de l'unité et de la diversité simultanée du monde. La paix est une science, un art, une culture. Pour Maria Montessori, la paix s'apprend. Dans la construction de la paix il n'est pas de petite chose et de petite échelle : ce qui se joue entre les femmes et les hommes, entre les enfants et les adultes, entre les enfants eux-mêmes, au niveau de la famille, de la classe, du quartier, se retrouve à l'échelle des rapports entre les nations. La tolérance, la capacité à reconnaître que l'autre est à la fois semblable à moi et digne des mêmes égards, et en même temps radicalement différent et digne du même respect, se pose à l'échelle des rapports interindividuels comme à l'échelle des rapports entre les civilisations et les religions. Il n'y a pas de petite échelle pour apprendre l'harmonie, il n'y a pas de petite échelle pour apprendre la tolérance. Maria Montessori écrivait il y a soixante ans : L'enfant a un pouvoir que nous n'avons pas: celui de bâtir l'homme lui-même.

La Formation De L'Homme

French

French version of 'Formation Of Man'.

Comment assurer la formation de l'homme sans passer par l'enfant, sans aider celui-ci à grandir comme être de liberté et de créativité, comme être ouvert à tous les possibles ? Comment faire en sorte que cette formation rejaillisse à sa manière sur le destin de toute l'humanité ? Toute sa vie, la grande pédagogue que fut Maria Montessori (1870–1952) a tenté de répondre à la question à travers ses écrits et la création d'écoles nouvelles. Dans cet ouvrage, elle insiste en particulier sur deux convictions fortes. Elle voit d'abord dans l'éducation le seul moyen de construire la paix entre les hommes. Elle explique ensuite combien l'enfant vient au monde en possession de directives intérieures qui permettront aux adultes de rendre cette éducation effective. C'est à partir de cette richesse déjà présente et qu'il convient de cultiver que l'enfant peut voir se développer sa personnalité propre. Ecrit en Inde et publié en 1949, ce texte apparaît comme le testament spirituel de Maria Montessori et livre la clef de toute son œuvre.

En cette période où des réformes du système éducatif se donnent explicitement pour projet de respecter les rythmes des élèves en organisant l'éducation par cycle, il faut lire les textes de Maria Montessori. Avant bien d'autres, elle avait expérimenté et pensé une telle progression, en relevant le défi de créer des outils pour qu'enfants et adolescents apprennent par eux-mêmes et non en écoutant un enseignement. Après L'enfant (0 à 6 ans), elle développe dans cet ouvrage les trois cycles suivants, de l'écolier jusqu'à l'étudiant.

Éduquer Le Potentiel Humain

French

French version of 'To Educate The Human Potential'.

Qui suis-je ? Quel est mon rôle dans l'univers ? Vivons-nous seulement pour nous-mêmes ? Quel est le sens de notre combat quotidien ? La réponse constitue le programme de l'éducation du potentiel humain que Maria Montessori propose dans cet ouvrage, publié en 1948, pour aider les enseignants à comprendre les besoins des enfants âgés de 6 à 12 ans. Elle nous révèle ici le secret du succès de sa méthode : stimuler intelligemment l'imagination créatrice de l'enfant pour éveiller son intérêt, puis faire germer dans son esprit les graines de la science se rapportant toujours à une idée centrale et inspiratrice : le plan cosmique. Tout et tous se reconnaissent et se rejoignent dans celui-ci en servant le grand objectif de la Vie : travailler ensemble pour le bien commun. Tout en retraçant le récit passionnant de l'évolution de notre planète, de l'apparition des premiers hommes et des civilisations les plus anciennes, l'auteur souligne l'importance de la préparation des enseignants, thème central dans la pensée montessorienne : ceux-ci, dit-elle, doivent être au service exclusif de l'être humain tout entier, c'est-à-dire d'un homme en mesure d'exercer librement et de manière responsable sa volonté et son esprit critique, sans préjugés ni craintes d'aucune sorte. C'est en cela que réside l'actualité et la modernité de la pensée de Maria Montessori.

Le Manuel Pratique De La Méthode Montessori French

À l'heure où les guides pratiques sur la méthode Montessori se multiplient, voici celui que Maria Montessori a elle-même conçu pour entrer dans les familles, écrit en espagnol en 1939 (étayant une première version de 1914 en anglais). Inédite en français, cette version historique a néanmoins gardé toute son actualité. Dans ce manuel, qui n'est pas seulement pratique, Maria Montessori présente aussi la philosophie de sa pédagogie en rappelant son objectif final : servir la Paix. Elle insistait en effet sur le fait que l'éducation était la meilleure arme pour la Paix, et qu'il fallait, pour l'atteindre, considérer l'enfant comme le guide de son éducation. Qui mieux que lui-même sait ce qui est bon pour son propre développement? Originalité de ce manuel : il est le seul illustré par des photos personnelles de Maria Montessori. La traductrice s'est efforcée de reproduire en couleur ces photos soigneusement choisies. La mise en parallèle des clichés historiques en noir et blanc et des photos contemporaines montre bien qu'en dépit du siècle qui s'est écoulé depuis l'ouverture de la première Maison des Enfants, et malgré toutes les évolutions de la méthode qui n'est ni figée ni passéiste, l'essentiel est resté identique.

La Découverte De L'Enfant French

French version of 'The Discovery Of The Child'.

N'élevons pas nos enfants pour le monde d'aujourd'hui. Ce monde n'existera plus lorsqu'ils seront grands. Et rien ne nous permet de savoir quel monde sera le leur : alors, apprenons-leur à s'adapter. Près d'un siècle plus tard, comment ne pas souscrire à cette réflexion de Maria Montessori (1870–1952), pionnière de la pédagogie moderne ? Alors que nos sociétés connaissent des changements permanents, alors que les modèles d'autorité évoluent, l'exigence éducative apparaît plus que jamais comme une préoccupation majeure. Dans ce premier volume de la Pédagogie scientifique, publié pour la première fois en 1926, Maria Montessori évoque en particulier l'expérience fondatrice de la Maison des enfants, une pré-école établie en 1907 dans un quartier populaire de Rome. Elle y développe les grandes intuitions d'une pédagogie où la préparation du milieu est la clef d'une éducation, d'une culture réelle de la personne humaine depuis la naissance.

L'Éducation Élémentaire French

Comment éduquer les enfants, instruire et construire leur liberté sans avoir d'eux une approche globale, en ignorant tout de leur environnement et de leur milieu de vie ? Comment vraiment les considérer comme des personnes humaines à part entière, avec leurs potentialités intellectuelles, corporelles, mais aussi ludiques et spirituelles ? Autant de questions que se posait déjà la grande pédagogue Maria Montessori (1870 – 1952) voici plus d'un siècle. Si le premier volume de la Pédagogie scientifique s'attache à décrire l'expérience fondatrice de la Maison des enfants, le second approfondit davantage des thèmes chers à l'auteur autour de l'éducation élémentaire. Ainsi du rôle du corps et de la préparation des pédagogues, de l'ambiance dans la classe, de la place de l'attention et de la volonté, de l'imagination et de l'intelligence. Un apport majeur à la théorie éducative.

L'originalité et la modernité des idées de Maria Montessori éclatent dans ce livre qui constitue la meilleure introduction à son œuvre. Dans un style clair et concis, la grande éducatrice italienne y expose les principes et les méthodes d'une éducation fondée tout entière sur le respect de la personnalité de l'enfant. Aider l'enfant à exprimer son individualité, lui donner les moyens de développer le meilleur de lui-même dans le respect de sa nature, tel est le rôle de l'éducateur et telles sont les voies de l'éducation nouvelle. Aller à la découverte de l'enfant, réaliser sa libération, ce projet ne cesse, depuis près d'un siècle, d'inspirer théoriciens et praticiens de la pédagogie.

Que deviennent les enfants, dans un monde qui a profondément changé, où dominent les contraintes économique, où les familles bougent, où les repères traditionnels au plan moral, religieux, humain sont souvent ébranlés ? C'est la question que pose Rénilde Montessori dans cet ouvrage qui s'appuie sur deux enracinements : la démarche pédagogique ouverte par Maria Montessori voici plus d'un siècle, pour permettre le développement et l'épanouissement des tout-petits, et la Déclaration universelle des droits de l'enfant, qui pose un cadre juridique pour la défense de leur personne et de leur intégrité. A l'heure où dans le monde tant d'enfants sont victimes de l'exploitation, de la guerre, de la faim ou de la pauvreté, privé des moyens maternels et humains de grandir, ce livre redit l'importance d'une éducation fondée sur la responsabilité, la liberté et la confiance dans la valeur infinie, le potentiel de tout enfant.

Exceptionally Good Friends

The characters in my book are two wonderful children who become friends in their inclusive early childhood classroom. The story is told through the perspective of Ruthie, a young girl who is developing typically (neurotypical) and through Clay, a boy with autism. This book was written in response to a growing need I saw in society to help someone who may know little or nothing about autism to gain understanding about autism, as well as to assist both regular and special education teachers in meeting the needs of the increasing numbers of children with autism now being placed in their classes. This book is intended to teach children and adults tolerance, empathy and understanding thus helping to reduce episodes of bullying. Bullying occurs at a higher rate in the ASD population. This book is also intended to furnish teachers (both regular and special education), therapists, parents and relatives practical, easy-to-implement ideas and resources to help children with autism spectrum disorder to experience success.
